

## **About the Songs - Who Does What**

Well, unlike with most recordings these days, we are not using auto-tune/ pitch altering devices on the voices. Of course, it would make Bob's lead voice sound more 'in tune' but probably less natural. Anyway, we don't believe in it. Easy to forget what natural voices actually sound like these days. Overall, these recordings are pretty accurate. We're not into an artificial sound .....with lots of compression and maximum levels done in final stages – as usually done now in popular music. It actually creates square waves, too – which our ears aren't designed for..
